

Announcement of Opening for Faculty Position
Institute for Space - Earth Environmental Research, Nagoya University
(ISEE Personnel Public Offering No. 6 FY2018)

1. Job Title:

Professor

2. Assignment Area:

Division for Chronological Research

3. Job Description:

The Institute of Space-Earth Environmental Research, Nagoya University (ISEE), one of the Joint Usage/Research Centers in Japan, fosters interdisciplinary research into space and earth sciences. To understand phenomena occurring in the integrated system of the Earth, Sun, and universe, ISEE promotes a wide variety of collaborative research for solving issues in the global environment and human society in the space age. A research division of ISEE, the Division for Chronological Research have conducted basic and applied research into radioactive age dating methods to understand the 4.6-billion-year history of the Earth, and commits to educating undergraduate and graduate students as a cooperative faculty of the Graduate School of Environmental Studies, and Nagoya University.

The Division for Chronological Research is seeking outstanding applicants for a full professorship who have a strong track-record in geochronological research and who will promote Space-Earth Environmental Science through an empirical approach, with the goal of understanding the history of Earth. Successful candidates are not only expected to promote international collaboration and interdisciplinary research as well as innovative research including the Joint Usage/Research programs of ISEE, but also contribute proactively to the development of young researchers and students.

4. Application qualifications:

- Doctoral degree
- Proficient Japanese language skills necessary to perform duties

5. Date of appointment:

April 1, 2019 or later at the earliest date possible

6. Application deadline:
